

## 500 SERIES FLOWMETERS

Variable area flowmeters with glass measuring tube for small and large flows, suitable for gases and liquids.

#### **APPLICATIONS**

Flowmeters can be used in the following industries: chemical and petrochemical, pulp and paper, food and sugar, pharmaceutical, glass, textile, mining, metallurgical and galvanizing industry. The instruments can also be used by manufacturers of water treatment plants, wine, thermal, hospital and anti-pollution plants.

#### **TECHNICAL DATA**

- Accuracy: ± 2% of f.s. (±3% with spherical float)
- Max. working temperature: 60°C. On request, versions can be made for use in temps. up to 200°C.
- Length of reading scale:
  - 230 mm. for all types up to mod. 505b
  - 340 mm. for types 500-Z1, 500-Z2, 500-Z3.
- Measuring range: 1+10
- Guided float (only on metallic version):
- for gases as from mod 502 b
- for liquids as from mod. 503 b.

The direct reading flowmeters of the 500 series have a rigid support (body) structure, not in contact with the fluid, consisting of 4 C/steel columns. The connections to the process can be threaded or flanged. All parts in contact with the fluid for measuring are made from various materials. The measuring tube is made of boron-silicate glass which is perfectly calibrated and therefore easily replaced by the user without needing to change the float. It is sealed with adjustable gaskets and glands.

The following table shows, for each type of instrument, the standard flows of water at 20°C and of air at 20°C and 760 mm. Hg.

#### **MATERIALS**

	Materials	Carbon steel	AISI 304	AISI 316	PVC	MOPLEN	PVDF	
FOR:	Body	Α	I	/	/	/	1	
E F(	Wet parts	A	I	J	Р	М	PF	
CODE	Float	/	/	J (1)	Р	M	PF	
	Gaskets	Neoprene (N)	Viton (V)					
1) Fro	1) From models 500-1 to 501-2 the float is in hard metal or black glass depending on the flow.							

Flowmeters in the 500 series are usually supplied with structures and connections for a nominal pressure of 10 Bar for metallic versions up to mod. 504; 8 Bar for mod. 505-b, 500-Z1, 500-Z2; 6 Bar for mod. 500-Z3 and all plastic versions.

### **ACCESSORIES**

- Min. / Max. flow alarms by inductive proximity transducers (and power supply of 220 V - 110 V - 24 V/50 Hz) with output on SPDT 5A, 220 VAC switches. Can be used on metal instruments but with the minimum structure of the 503 model (from 10 I/h to 30 m³/h of H<sub>2</sub>0).
- Protection in transparent plastic material.

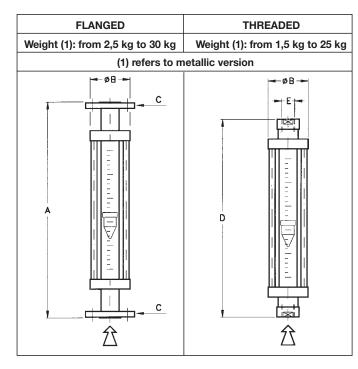

#### **HOW TO ORDER:**

Example: 501-3 - A - I - J - N

501-3 model

A body in carbon steel
I wet parts in AISI 304
J float in AISI 316
N neoprene gaskets

Where there are fluids other than water, the following data is required: type of fluid, specific gravity, viscosity, temperature, and pressure under operating conditions.
