## O <br> 國 OFFICINE OROBICHE

## FLOW SWITCH - PLJ SERIES

## Flow switch for liquids

Device meant to control the flow of liquids inside piping units of :

- Industrial plants
- Conditioning and heating systems
- Firefighting systems in compliance with the EN 12259-5:2003 Standard entitled «Fixed firefighting systems Part 5 - Water flow detectors»

The flow switches are available in two versions:

1. With 1" NPT-M connection
2. With 1" GAS-M connection

## Specifications

All metal parts are in stainless steel (material compliant to Standard EN-12259-5)
maximum working pressure: 25 bar
Room temperature limits: $-20^{\circ} \mathrm{C} \div+85^{\circ} \mathrm{C}$
Liquid temperature limits: $-30^{\circ} \mathrm{C} \div+120^{\circ} \mathrm{C}$
Protection rating: IP65
Set of stainless steel vanes (material compliant to Standard EN-12259-5)

Housing: In ABS
Cable trays: M14
Contact: SPDT 15 (8A) 24/250 Vac Micro-switch

## Electrical connections

The COM-NO contact closes, at the calibration value, when the flow increases
The COM-NO contact opens, at the calibration valu, when the flowdecreases

## SPDT VERSION <br> 

# NO=NORMALLY OPEN <br> C=COMMON <br> NC=NORMALLY <br> <br> CLOSED 

 <br> <br> CLOSED}

## Installation

- The PLJ flow switch can be mounted in any position
- The arrow must be oriented in the direction of the flow
- In the event of installation with vertical pipes, the instrument needs recalibrating to compensate for the weight of the vanes
- Fit the instrument along a straight run of the piping, in the absence of filters, valves, etc and along at least five times its diameter, both upstream and downstream.
- The instrument is delivered equipped with 5 vanes. If necessary, the vanes can be cut by reference to the inner diameter of the piping.

Table of flows

| Piping Ø | Min setting m3/h | Max setting m3/h |
| :---: | :---: | :---: |
| $1^{\prime \prime}$ | $0.6(1)$ | $1.9(2)$ |
| $1^{1 / 2 "}$ | $0.8(1.3)$ | $2.8(3)$ |
| $1 \frac{1}{2 \prime}$ | $1.1(1.7)$ | $4.1(4.4)$ |
| $2^{\prime \prime}$ | $2.2(3.1)$ | $6.1(6.6)$ |
| $2^{1} / 2^{\prime \prime}$ | $2.8(4.1)$ | $7.3(7.8)$ |
| $3^{\prime \prime}$ | $4.3(6.2)$ | $11.4(12)$ |
| $4 "$ | $6.1(8.4)$ | $17.3(18.4)$ |
| $5 "$ | $9.3(12.9)$ | $25.2(26.8)$ |
| $6 "$ | $12.3(16.8)$ | $30.7(32.7)$ |
| $8^{\prime \prime}$ | $38.6(46.6)$ | $90.8(94.2)$ |

Data inside brackets shown in the table refers to closing values, whereas data outside brackets refers to opening values

The flow switches are factory-set to the minimum trip value
By turning the adjusting screw that is inside the housing clockwise the opening value increases.
